

Etiquette

Before the Game :

Preparation - Dress code and green friendly spike regulation is in effect. Arrive at least 15 minutes prior to tee time for payment of green fee and warm-up exercises. Classic dress for women: knee-length skirt, collared sport shirt, golf shoes. Never carry your clubs into the pro shop. You must have your own bag: no sharing. It's a good idea to use sunscreen or sun block.

Starting Your Game - Golf is a social sport. Please do not go in single. You can play with friends or family members.

The Honour - The golfer with the lowest score on the previous hole earns "the honour". On the first tee, throwing a tee into the air, whomever the tee points to when it lands, the one hits first.

Where to Stand - The best location to stand is face onto them as they address the ball, well back from their field view. You must be motionless and quiet as other players prepare to hit the shot.

During the game

On the Course (after tee-off) - Whoever is furthest away from the hole plays first.

Replace Divots, Rake bunkers, Respect all course directional signage.

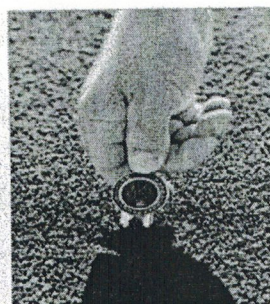

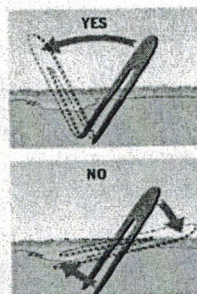

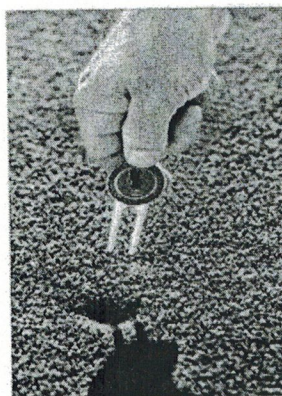

Carts (hand, powered) Keep all hand cart on pathways and off all tees and green. Power cart operators must abide by all directional course signage, utilize all designated pathways and stay a minimum of 20 feet from all greens and tees.

Personal Alcoholic Beverages are strictly prohibited on the golf course.

Waving Groups Through - Pace of Play is important. Slow play is, unfortunately, a common problem. Please allow faster group to play through by weaving to them.

On the Green (for putting) - On the putting green, you should mark your ball with a marker. Then remove your ball to wipe the dirt off so to roll straight in putting. Your ball may be in the line of putt of others and causes visual distraction for others.

Repair the Damage on Putting Green - The green is a delicate place, any bump or mark will cause the ball off the line. Do not walk on the line of putt of others as an important "courtesy".

To fix ball marks on greens, start with your repair tool at 45 degrees opposite the flight of the ball. Then dig in and pry up toward the vertical. Work your way around all sides of the ball mark again, going in at 45 degrees and pushing up to the vertical. Tap the ball mark down level with the bottom of your putter. That's it.
Note: Don't pry down on the tool trying to bring the bottom of the hole up. That creates a dead spot that affects the putting surface. With practice, you should be able to repair a mark so that it is totally invisible.

Repairing the Damage

Tending the Flag - When you are putting, you or your partner have to remove flag from the hole because if you hit the pole, you will receive a penalty.

Keeping Score - One scorekeeper for the group, fill out the card when you are away from green, preferably on the next tee.
