In order to have the most accurate baseline score for this coming school year we will need to ensure that all students have an environment in the home that is free from distraction. In an effort to create an environment similar to the one provided in a school setting we are asking that the below steps are taken during the duration of the test (approx. 30 minutes).

- Cell phones/Tablets are left in another room or are powered down.
- Test is taken in a room with no TV or Radio on.
- Test is taken independently or alone and free from distraction of other household members.
