

WISCONSIN WRESTLING MINIMUM WEIGHT PROJECT

FAST-FOOD ALTERNATIVES

Fast foods are quick and easy. But, many of these foods are high in fat and calories. Most people don't need more fat in their diet because the body stores it so efficiently.

Carbohydrates provide energy much more quickly than fat. They are also a source of stored energy. The storage form of carbohydrate, glycogen, fuels muscle contractions; this is another reason athletes need a high carbohydrate diet.

EAT MORE OF THESE

Baked potato,
coleslaw, salad
